

ANIMATION

Home / Pathways / Creative Arts / Animation

Do you love drawing or playing video games in your spare time? Are you curious how video games are created? If you'd like to turn your passion for cartoons into a career, our animation program is a perfect for you!

Allan Hancock College's animation program provides students with both the traditional and digital artistic skills that are at the center of the animation, visual effects, and video gaming industries. Build your animation skills and portfolios in our state-of-the-art studio equipped with iMac computers, Cintiq monitors, 3D printers, and much more.

With an associate degree in animation, students will be prepared for entry-level careers, such as a digital sculptor, application designer, cinematic layout artist, illustrator, visual effects artist, game artist, digital content creator, and many more. Hancock's animation program graduates are currently employed in local firms and 3D modeling companies, large corporations like LinkedIn or self-employed as freelance designers and illustrators.

Graduates of the program may also transfer to a four-year university with a strong animation program, including CSU San Jose, CSU Long Beach or CSU Fullerton.

This program will help you to:

- develop critical thinking skills
- learn written and visual storytelling
- develop attention to detail
- gain technological expertise
- learn how to be flexible in creativity
- become a decisive problem-solver
- gain leadership skills
- collaborate with peers

Media Arts: Animation and Game Art - Associate in Science
