EXPOSURE PROTOCOL
BOOSTED OR VACCINATED AND NOT YET BOOSTER-ELIGIBLE.

**ISOLATION RULES (COVID-POSITIVE)**
Everyone, regardless of vaccination status, previous infection, or lack of symptoms, must isolate for at least five (5) days.
- Isolation can end after five days if symptoms are not present or are improving and a test on day five or after is negative.
- If fever or other symptoms are not improving, isolation must continue for 10 days.
- If symptom free after day 10, isolation can end. No test required.

**Definitions:**
- **Days** - Date of exposure or positive test is “day zero”, then begin counting five (5) days beginning the next day.
- **Booster-Eligible** - At least 5 months after completing your primary COVID-19 vaccination series. Anyone who received their primary series less than five months ago IS NOT YET eligible.
- **Isolation** - Separates those infected with COVID-19 from people who are not infected.
- **Quarantine** - Restricts the movement of persons who were exposed to COVID-19 in case they become infected.
- **Test** - A rapid antigen test is recommended to end isolation for return-to-work or return-to-school purposes if the person has previously tested positive using a PCR test. A PCR test can be used to end quarantine if the person has not previously tested positive using a PCR test in the past 90 days.

**Note:** If an Infectious person is in the household, then the quarantine period for the household contacts is 5 days beyond the infectious person’s isolation period.

Allan Hancock College
