

SPRING 23 COVID CAMPUS EXPOSURE PROTOCOL

Definitions:

Days - Date of exposure or positive test is "day zero", then begin counting five (5) days beginning the next day.

Isolation - Separates those infected with COVID-19 from people who are not infected.

Quarantine - Restricts the movement of persons who were exposed to COVID-19 in case they become infected.

Test - A rapid antigen test is recommended to end isolation for return-to-work or return-to-school purposes if the person has previously tested positive using a PCR test. A PCR test can be used to end quarantine if the person has not previously tested positive using a PCR test in the past 90 days.
