

Artificial Intelligence (AI) in Instruction

Whereas the Chancellor's Office for California Community Colleges supports human-centered AI grounded in equity, accountability, and student success;

Whereas, AI can be considered a tool, like calculators and computers;

Whereas, generative AI has proliferated across all manner of technologies, both academic and general;

Whereas, the function of Academic Freedom allows faculty to allow or disallow AI use in their classroom;

Therefore, be it resolved, that AI in Instruction is at the sole discretion of the instructor of the course;

Be it further resolved, that faculty are strongly urged to state their AI policy to students;

Be it further resolved, that faculty are not compelled to use a particular AI tool or app even if provided by the District or the Chancellor's Office;

Adopted May 28, 2026
